HG

Dear Uri,

It was very nice to meet you.

Following our talk, I went over the files I have from the time I was working at the Center for Advanced Hindsight. The data from my research with Dan is in .txt files that were produced automatically from the experimental program (which I programmed in VB), and then compiled into an SPSS file. Thus, I don't have any data (from my research) that is an Excel file. Sorry.

However, there were people who worked in the lab who had the Office package that was installed under Dan's account/name. As an example, I found an Excel file that one of the RAs made as an example file for new people who come to work in the lab. This is a file that was 100% created by an RA but is under Dan's name (as you can see in the file and the attached screenshot).

I hope this helps.

Best,

Guy

Subject: Advanced Hindsight

Hi Guy,

I understand Maya mentioned I may reach out.

I am pursuing a thread of evidence which involves chatting with people who were at Duke's Center for Advanced Hindsight back in 2011.

It's perhaps easiest to explain on a call, my # on whatsapp is +34 651 735 872.

But if you prefer we can keep it over email, if it's more convenient.

Thanks!

Uri
